Re: EPA Pretreatment Notification of Zero Discharge Categorical Industrial User Requirements,
ICIS Number: WY-PF00019

Dear Mr. Will:

L&H Industrial is an industrial user of the City of Sheridan's publicly owned treatment works (POTW), which does not have a Pretreatment Program approved by the U.S. Environmental Protection Agency. Therefore, the EPA Region 8 serves as the Control Authority and directly oversees compliance of industrial users that discharge to the City of Sheridan's POTW and is partnering with the City to ensure its POTW is protected from potential impacts of pollutants discharged from non-domestic sources. L&H Industrial performs unit operations that are defined by the Metal Finishing Point Source Category Pretreatment Standards at 40 C.F.R. 433; however, the facility does not discharge non-domestic wastewater to the City of Sheridan's POTW. Therefore, L&H Industrial is categorized as a zero-discharging categorical industrial user (CIU); monitoring requirements do not apply but reporting and notification requirements at 40 C.F.R. 403.12 of the Pretreatment Regulations do apply.

Enclosed is information regarding L&H Industrial's reporting and notification requirements as a zero-discharging CIU (Enclosure 1, Zero Discharging CIU Requirements), effective October 1, 2024. This enclosure sets forth specific notification and reporting requirements. Enclosure 2 is the associated fact sheet, which provides a rationale for the conditions set forth in Enclosure 1.

The Zero Discharging CIU Requirements and Fact Sheet were public noticed on EPA's website on August 16, 2024 for a 30-day public comment period. No substantive comments were received.

The Pretreatment Regulations at 40 C.F.R. 403.12(j) require L&H Industrial to promptly notify EPA and the City of Sheridan in advance of any substantial change in its unit operations or wastewater management that could affect its zero-discharge status.

Nothing contained in this notification package or in any EPA regulations restrict State or local agencies from imposing additional requirements in accordance with applicable laws, including requirements which are more stringent than those imposed by the EPA.

If you have any questions about the enclosed information, please contact Al Garcia at 303-312-6382 or garcia.al@epa.gov.

Sincerely,

Michael Boeglin, Supervisor
Wastewater Section

Enclosures:

1. Zero Discharge CIU Requirements under the Metal Finishing Point Source Category and the General Pretreatment Regulations
2. L&H Industrial Fact Sheet
