

Tribal Emergency Procedure Plan for Small Drinking Water Systems

All public water systems must have an Emergency Procedure Plan (EPP) that details emergency operations procedures for possible foreseeable emergencies such as power outage, loss of water, equipment failure, development of unsafe conditions, and other emergency conditions. When a sanitary surveyor conducts a sanitary survey on your system they will ask if you have an EPP.

System Name:	
Public Water System Number:	
Administrative Contact Name/Number:	
Owner Name/Number:	
Operator Name/Number:	
Population Served:	
Number of Service Connection:	
Chemicals Used to Treat Water:	
Name/Number of Chemical Supplier:	
Life Threatening Emergency Number:	
Law Enforcement Number:	
Critical/Vulnerable Customer Numbers:	
EPA Business Hours Emergency Number:	303-312-6780 (UT, WY, or CO); 406-457-5041 (MT); 605-945-1199 (ND or SD)
EPA After-Hours Emergency Number:	303-312-6327
IHS Contact Name/Number:	
BOR Contact Name/Number:	
Alternate Water Source:	
Power Company Number:	
Electrician Number:	
Plumber Number:	
Parts Supplier Number:	
Pressure Loss/Water Outage Plan:	
Water Contamination Plan:	
Shut-Off Location and Instructions:	
Spare Parts Location:
