Re: Approval of Request for Extension for Response to Technical Comments
Carbon TerraVault Holdings LLC (CTV) III Project
Underground Injection Control (UIC) Permit Application
Class VI Pre-Construction Permit Application No. R9UIC-CA6-FY22-5.1-5.6

Dear Faisal Latif:

On February 20, 2024, we sent you a letter indicating that additional information is necessary to clarify and supplement the subject UIC Class VI permit application. In that letter, we requested that you submit the additional information by March 22, 2024.

On March 18, 2024, you emailed a request for an extension to submit the requested information by May 24, 2024, along with a justification that the information EPA requested cannot be provided by the original due date and additional time is needed for the model simulation runs as CTV was asked to run several sensitivity analyses on the model, and for the staff time limitation as the same CTV team members are responding to the technical review comments on another CTV project for an earlier targeted deadline. This letter confirms that we find your justification and the alternative date by which you will provide the requested information acceptable.

If you have any questions about this letter, please call me at (415) 972-3971, or contact Calvin Ho at (415) 972-3262.

Sincerely,

David Albright
Manager, Groundwater Protection Section
